

National Weather Service Springfield Missouri

National Weather Service Springfield, MO Situation Report: Jan 12, 2012 -0530 AM CST

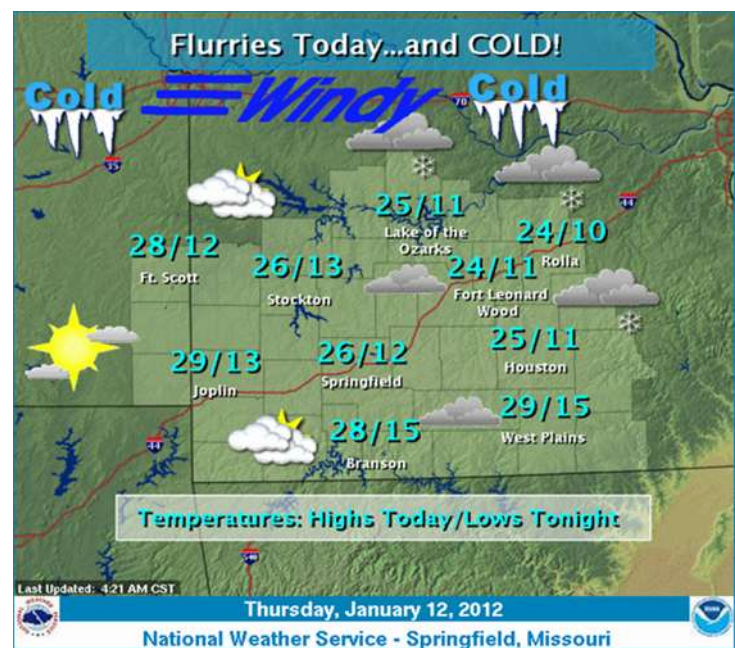

Weather Hazards: Residual Snow and Unseasonable Cold and Wind Chills

Current Watches/Advisories/Warnings: Snow Advisory for parts of the area this morning.

- Some light snow will continue over central Missouri early today, otherwise flurries will be possible.
- Reports indicate very light snow occurred last night ranging from a half inch in most areas up to around 1.5 inches in parts of central Missouri.
- Despite the minor amounts of snow, roads were slick with numerous accidents reported last night and early this morning.
- Snow advisory will likely be cancelled early in some areas where significant snow has ended.

Impact Risk/Risk Confidence/Timing: Unseasonably cold temperatures/wind chills. Confidence is high through Friday.

- For today temperatures will not make it out of the 20s.
- Wind gusts of over 30 mph with wind chills in the single digits and teens can be expected today.
- Lows tonight will be well down into the teens with some single digits readings possible. Wind chills near or just below zero are expected.

Outlook: A warming trend this weekend. Windy and dry. Elevated fire danger this weekend.
